DETAILED ACTION

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given by Mr. Brian Woodworth during a telephone interview on 09/29/2008.

Replace Abstract as follows:

-- A method for dynamically adjusting the screen brightness of a pump screen display. The method includes providing a medical pump including a screen display having a first screen brightness and a second screen brightness. The method further includes providing a medication management unit operatively connected to the medical pump where the medication management unit is configured to transmit operating instructions to the medical pump. The operating instructions transmittable from the medication management unit to the medical pump include instructions to display the first screen brightness during daytime hours and instructions to display the second screen brightness during nighttime hours. The method also includes determining a time of day using the medication management unit and transmitting from the medication management unit to the medical pump instructions to display the first or second screen brightness. --

Replace Title as follows:

-- METHOD FOR ADJUSTING PUMP SCREEN BRIGHTNESS --

In the specification:

After "co-pending application" (page 14, line 19; page 29, line 5; page 32, line 4), insert --
10/783,877 --.

Cancel Claims 48 and 49.

Amend Claim 45 as follows:

-- A method for dynamically adjusting the screen brightness of a pump screen display operatively associated with a medical pump, comprising the steps of:
providing a medical pump comprising a screen display operatively associated with a medical pump, the screen display having a first screen brightness and a second screen brightness variably-screen brightness;
supplying a plurality of screen brightness level settings for the medical pump as part of instructions from a medication management unit in communication with the medical pump providing a medication management unit operatively connected to said medical pump, said medication management unit configured to transmit operating instructions to said medical pump, said operating instructions comprising instructions to display said first screen brightness during daytime hours and instructions to display said second screen brightness during nighttime hours;
determining a current time of day using said medication management unit; and
transmitting instructions from said medication management unit to said screen display to display said first screen brightness or said second screen brightness based upon the determined time of day,
automatically selecting one of the plurality of screen brightness level settings to use as an active screen brightness level setting for the medical pump when the current time of day is daytime;
automatically selecting another of the plurality of screen brightness level settings to use as the active screen brightness level setting for the medical pump when the current time of day is nighttime; and
operating the screen display of the medical pump using the active screen brightness level setting selected for the current time of day;
wherein the plurality of screen brightness level settings supplied by the medication management unit to the medical pump can be customized via the medication management unit by a medical care facility that uses the medical pump. --

Amend Claim 50 as follows:

-- The method of claim 45, wherein the said first screen brightness is brighter than said second screen brightness, level setting selected when the time of day is nighttime is lower than the screen brightness level setting selected when the time of day is daytime. --

Pertinent Art Cited

The following US Patent Applications reveal the current state of the art:

Shimazu et al. (US 2002/0015018) teaches of a method for dynamically adjusting the screen brightness of a screen display (monitor panel; fig. 1), comprising the steps of:

providing a screen display (31;fig. 1A-B), the screen display having a first screen brightness and a second screen brightness (daytime vs. nighttime; paragraph 0036, lines 3-11);

adjusting screen display to display said first screen brightness during daytime hours (fig. 1A; paragraph 0037, lines 1-3; paragraph 0069, lines 1-7);

adjusting screen display to display said second screen brightness during nighttime hours (fig. 1B; paragraph 0036, lines 3-5; paragraph 0068, lines 1-7); and

determining a current time of day (illumination detecting means; paragraph 0036, lines 3-5; paragraph 0037, lines 1-3).

However, Shimazu does not teach at least providing a medication management unit operatively connected to said medical pump, said medication management unit configured to transmit operating instructions to said medical pump; and transmitting instructions from said medication management unit to said screen display to display said first screen brightness or said second screen brightness based upon the determined time of day.

Allowable Subject Matter

Claims 45 and 50 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The primary reason for the allowance of claim 45 is the inclusion of the limitation "providing a medication management unit operatively connected to said medical pump, said medication management unit configured to transmit operating instructions to said medical pump; and transmitting instructions from said medication management unit to said screen display to display said first screen brightness or said second screen brightness based upon the determined time of day". The prior art of record, taken alone or in combination, fails to disclose or render obvious.

Claim 50 are allowed due to their dependency on claim 45.

Art Unit: 2863

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
